

**Leak Adjustments for Sewer Customers**

The Jefferson County Public Service District (JCPSD) will issue a leak adjustment for sewer customers who incur a water leak on the customer's side of the meter when the customer's water utility has granted the customer a leak adjustment for water usage and the leak qualifies for a leak adjustment under the Public Service Commission (PSC) rules. The leak adjustment will be given after the leak has been repaired and after the customer has given proper evidence of receipt of a leak adjustment by the customer's water utility. A customer receiving a leak adjustment will be subject to the District's regular charges up to the amount of the customer's average monthly usage for the preceding twelve (12) month period. The customer receiving the leak adjustment will be subject to the District's leak adjustment rate for all volumes in excess of the customer's average monthly usage.
